

## PVC K/WRIST LENGTH GLOVES

### Description

Passion AB0013 gloves are specifically designed for industrial applications requiring high-level chemical resistance and durability.

Made of PVC-coated polyester-cotton knit, these gloves feature a polyvinyl chloride (PVC) coating that provides excellent protection against a wide range of chemicals.

The polyester lining adds to the gloves' comfort, ensuring a soft and supple feel for extended wear. Ideal for use in mechanical, chemical, and aquatic work environments.

The gloves offer superior chemical resistance while maintaining a comfortable and flexible fit. Their soft texture ensures ease of movement and comfort for the wearer, making them a top choice for professionals in demanding work environments.

### Special Instructions

Although the manufacturer has examined these gloves under the system for ensuring quality of production by means of monitoring and inspection, we recommend that all gloves should be thoroughly inspected before use to ensure no damage is present.

None of the materials or processes used in the manufacture of these products are known to be harmful to the wearer. The gloves and information contained herein are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. Actual conditions of use cannot be directly simulated in a test environment, therefore it is the responsibility of the user and not the manufacturer or supplier to determine the suitability for intended use.

### Specifications

Style:	Fully dipped with wrist cuff
Liner:	Polyester liner
Palm:	Smooth finish
Mass:	120g per pair (size 10)
Cuff:	Knitted wrist cuff

### Packaging, Storage & Obsolescence

Packed 12 pairs per bundle and 120 pairs per carton for shipping.

Store in a cool, dry, dark place. Stored correctly, the gloves physical properties will not change for up to three years.

### Cleaning & Maintenance

Gloves should not be left in contaminated condition if re-use is intended especially if potential hazards exist. Before removal from the hands excess contaminant should first be removed. Should this not be possible, it is advisable to ease left and right hand gloves off using the gloved hand and remove the gloves without the contaminant contacting the bare hands. The gloves may then be decontaminated with mild detergent solution, then rinsed with clean water and dried ideally with some air movement.

### Disposal

All industrial waste should be disposed of correctly according to local regulations and good disposal practice. Gloves should be disposed of considering the hazardous substances they were used for. Please consider recycling.

### Sizes Available

Code	Size	Palm Length
AB0013	10	125mm (±5mm)

*\*As per the EN420 standard, actual measurement of gloves are determined by the manufacturer, taking into account the behaviour of the glove material, its thickness (such as leather gloves, PVC gloves etc), elasticity and the intended use.*

*\*Sizing charts only serve as a guide. Sizes and measurements are for reference only. In order to make an informed decision, always try on the gloves as each glove features a unique construction to accommodate a wearer's preferences.*

### Marking

### Measurement Guide

Feature:

1. Super-soft PVC formulation provides comfort and flexibility.
2. Elastic wrist opening, fit to the hand shape, comfortable to wear, easy to put on and off.
